

Creation of a VET programme !

On the 30th of January 2025, Korenika - več kot zgodba hosted the partners of FARM'IN project at its beautiful location in Salovci, Slovenia to share the mapping results for social farming in Italy, Slovenia & Greece and develop together the content and methodologies for the creation of the "Pilot Course for trainers and operators in Social Farming".

Each partner country – Italy, Greece, Slovenia - starts from a different history and reality, and sharing our experiences is the starting point for a global response to individual needs.

The aim remains the same: sharing experiences and growing Social Farming in Europe.

A special thanks to Korenika Social Farm for the exquisite hospitality and for telling us about Social Farming in Slovenia through their reality!

Participation of FARM'IN in Social Farming Event !

On May 27–28 2025, during the event organized by CREA for the "10th anniversary of Law 141/2015 on Social Farming" in Italy, Agricoltura Capodarco Cooperativa Sociale had the honor of sharing its inspiring story—over 40 years of commitment, passion, and inclusion through agriculture.

It was a great opportunity to connect with institutions, cooperatives who have helped shape Social Farming in Italy and present the FARM'IN project, highlighting our goal to build a replicable training model across Italy, Greece, and Slovenia.
