

Train – the – Trainers course completed in Italy !

The two days (26&27/06/2025) of training on the Farm'in-Inclusion Through Social Farming project are completed, after the online sessions.

It was an important moment to meet all the people who have engaged in this training path and to get to know where social agriculture was born, on the field and in contact with the land.

The instrument of inclusion is always her: nature, its fruits and the infinite resources that drive inclusion and dignity through work.

Thanks to all our trainers who got their hands dirty in the true sense of the word and who tested themselves to learn about social agriculture on a special visit, emphasizing the region's commitment to sustainable, cross-border rural entrepreneurship.
