

Final project event in Italy !

We recently gathered at Agricoltura Capodarco's farm in Grottaferrata to analyze the results of the Erasmus+ FARM'IN project. Beyond presenting training tools and future strategies, the event featured a lively exchange between project partners and local farmers.

These beneficiaries shared their personal journeys in social farming, sparking a productive Q&A session about the program's impact. The takeaway? FARM'IN has a new ground in Italy, Slovenia, and Greece, and there is a shared enthusiasm to keep this momentum going.
